

Dear colleagues at ISPP,

My name is Hanne M Watkins and I'm a PhD student at the University of Melbourne, Australia. I am currently undertaking a study for which I **require academic psychologists - post graduate students, post doctoral fellows, and all levels of faculty - as participants**. (In previous rounds of recruitment, I was focusing on social psychologists, but now all psychological researchers are eligible.)

As this study is about the current discussion around replicability in our field, I would particularly value the input of members of ISPP, as representative of a diverse group of psychological researchers.

This study has ethics approval, and more information is provided in the plain language statement at the start of the study.
