

“Evidence for Society. Transforming the future of European people through research.”

The Conference “Evidence for Society. Transforming the future of European people through research” (November, the 8th,) is jointly organized by the IMPACT-EV Consortium and Ms Soledad Cabezón, Member of the European Parliament, who has coordinated the Report on the assessment of Horizon 2020 implementation in view of its interim evaluation and the Framework Programme 9 proposal (2016/2147(INI)).

The conference room counts with 163 seats distributed for a diversity of attendants: MEPs, representatives of EU member countries’ parliaments, scientists, and science managers as well as end-users involved or with an interest in the social impact of EU research. People from more than 15 countries have already registered. Due to the room’s limited capacity, if you are interested in attending the conference, please let us know by answering this e-mail to your earliest convenience.

From 3pm to 6pm Evidence of the social impact achieved by EU funded projects will be presented by different agents including scientists, policy makers representing different levels of policy implementation – regional, national, and European- as well as end-users who have benefited from the social impact of EU research. A draft program is attached which is subject to changes.

The FP7 IMPACT-EV project is addressed to mapping and evaluating impact of research in Europe. This project has analysed the impact of EU FPs’ funded research projects identifying the scientific impact but particularly focusing on the political and social impacts of these research projects.
