

Call for collaborators for a cross-cultural study on gender stereotypes across 40+ countries

It has been 30 years since a large cross-cultural study on masculinity and femininity was completed (Williams & Best, 1990).

Our project aims to collect data **in at least 40 countries** to examine prescriptive and proscriptive gender stereotypes and possible barriers towards gender equality.

We are looking for collaborators in various countries to collect student data (at least 100 men and 100 women) by October 30th 2019. The participants should be students from an undergraduate/bachelor (or similar) psychology (or any other) course.

Collaborators who collect data in their respective countries will be granted **co-authorship** on two planned multi-country peer-reviewed publications.

This is the first study conducted within the project titled: Toward Gender Harmony – Understanding the Relationship between Masculinity Threat and Gender Equality Across Cultures.

More details can be found here: <https://towardsgenderharmony.ug.edu.pl/collaborators-faq/>

or on our webpage:

www.towardsgenderharmony.ug.edu.pl

You can also contact us directly via email: towardsgenderharmony@ug.edu.pl

Feel free to circulate this call among your colleagues!

Best regards,

Natasza Kosakowska-Berezecka (University of Gdansk, Poland) (Principal Investigator)

Our team:

Deborah Best (Wake Forest University, USA)

Tomasz Besta (University of Gdansk, Poland)

Jennifer Bosson (University of South Florida, USA) (main collaborator)

Saba Safdar (University of Guelph, Canada)

Joseph Vandello (University of South Florida, USA) (main collaborator)

Anna Włodarczyk (Universidad Católica del Norte, Chile)

Magdalena Zawisza (Anglia Ruskin University, UK)

Magdalena Żadkowska (University of Gdansk, Poland)

Project supported by a HARMONIA 6 grant from the National Science Centre in Poland (2017/26/M/HS6/00360) awarded to Natasza Kosakowska-Berezecka
