

New Book: The Palgrave Handbook of Deceptive Communication (2019) brings together more than 100 scholars from an array of fields to unravel the topic of lying and deception in human interaction. Truth-telling, lies, and the many gray areas in-between are examined in the contexts of identity formation, interpersonal relationships, groups and organizations, social and mass media, marketing, advertising, law enforcement interrogations, court, politics, and propaganda. This interdisciplinary handbook also explores cultural and ethical dimensions of deception, as well as strategies for detecting and deterring deceit.
