

Seeking Unpublished Work on Collective Action for New & Large Meta-Analysis

Dear Colleagues,

Maximilian Agostini and I are currently finishing up a new, large meta-analysis on predictors of collective action. We are now looking to include any unpublished work we might have missed in the period January 1, 2008 - April 1, 2019 if it includes the following:

- * quantitative, individual-level data
- * one or more measures of collective action
- * one or more measures of group identification, group-based unfairness/injustice/anger, group efficacy beliefs, and/or moral conviction

If you have unpublished work that fits these criteria, we would love to include it in the meta-analysis. If you are willing to share such work, please let us know at m.agostini@rug.nl and/or m.van.zomeren@rug.nl.

Please note that if there is a written report of the work, which would be very helpful to receive. But even if that is not the case, please contact us and we can let you know what we need for the work to be included in the meta-analysis.

Best wishes,
Maximilian Agostini and Martijn van Zomeren (University of Groningen)
